

Assistant/Associate Professor – Artificial Intelligence

Faculty of Engineering and IT

The Faculty of Engineering and IT is inviting applications for a full-time **Assistant/Associate Professor** position in **Artificial Intelligence (AI)**, starting **September 2025**. We are seeking candidates who hold a PhD in Artificial Intelligence or a related computing field and are passionate about teaching (both undergraduate and graduate courses), and research.

Key Responsibilities

- Publish high-quality research in internationally recognized, peer-reviewed journals.
- Secure research funding to support robust research programs/directions.
- Supervise student research, including AI-related UG graduation projects, MSc dissertations, and PhD theses.
- Design and deliver undergraduate and graduate courses.
- Engage in technology-based teaching approaches and contribute to the continuous improvement of learning practices.
- Participate in outreach activities, such as continuing education workshops or community engagement initiatives.
- Participate in department, faculty, and university committees as assigned.
- Advise and mentor UG & PG students.

Required Qualifications

- A PhD in Artificial Intelligence or a closely related computing field from an accredited institution.
- A proven research track record in Artificial Intelligence, with publications in ISI or Scopus-indexed journals.
- Strong communication skills in oral and written English.

Desired Qualifications

- Experience working effectively with a diverse student population.
- Demonstrated excellence in teaching and a commitment to innovative educational practices.
- Experience in supervising undergraduate and graduate research projects.
- Familiarity with ABET accreditation processes and curriculum development.
- Teaching experience in multicultural settings is highly desirable.
- Relevant industrial or professional qualifications and experience.

Application Process

Applicants must submit the following documents:

1. **Cover Letter** explaining your suitability for the position.
2. **Curriculum Vitae (CV)** detailing employment history, modules taught, student supervision and completions, research funding, and a list of ISI/Scopus-indexed publications.
3. **Teaching Statement**, outlining your teaching philosophy and approach.

4. **Research Statement**, describing your research interests, methodologies, and future plans.
5. **Portfolio** of AI and Data Science projects (if applicable) or samples of student work.
6. **Contact Information** for three academic referees.

Please use the “**Apply Now**” link below to submit your application by **13 April 2025**. For inquiries, contact **Careers@buid.ac.ae**.

Note

The appointment is subject to the completion of all necessary labor and immigration formalities. Delays may postpone the start date of employment.

We encourage applications from candidates of diverse backgrounds. The university is committed to fostering a supportive and inclusive environment.
